Trade Manage selects SunGard Fix engine

May 28th 2003 - **Trade Manage**, a New Jersey-based service bureau and solutions provider for order routing and order management systems, has selected the SunGard Fix Engine from **SunGard Business Integration**.

Trade Manage specialises in order routing and management specifically for the broker/dealer community using its Esharx front-end order management solution. The Fix engine will connect proprietary and third-party order management and routing systems to over 80 counterparties.

In addition to using the engine for its own business Trade Manage has recommended the use of the Fix engine from the London-based integration solutions vendor to several of its clients, including **Yamner & Co.**
